

0:00

\$2.4 million in additional profit in 5

0:04

days that's what one email campaign that

0:06

we did in one of our portfolio companies

0:08

Genera and if you don't know who I am my

0:10

name is Alex rosi own acquisition. it's

0:11

a portfolio of companies Des over \$250

0:13

million a year and I make these videos

0:15

so that hopefully you can grow your

0:16

business and make lots of money and then

0:18

maybe someday I can invest in your

0:19

business and help it grow too I want to

0:21

walk you through step by step exactly

0:22

what we did in this email campaign so

0:24

that you can use the same thing in your

0:26

business to get ideally even better

0:28

results so let me walk through the

0:30

context of this business number one is

0:32

it's a business that relies

0:33

predominantly on paid ads it's a

0:34

consumer-based business so lots of media

0:36

to generate lots of volume of

0:38

transactions and leads so we had a very

0:40

large email list and for the most part

0:43

we weren't doing much with that email

0:45

list besides following up for the

0:46

initial transaction and then after that

0:48

they were dead to us which I definitely

0:49

don't recommend doing but at the time

0:51

going into this it wasn't a constraint

0:53

of the business and then it became one

0:55

because all of a sudden some of our ads

0:56

weren't performing as well and all of a

0:58

sudden we thought oh my gosh we might

0:59

not head our quarterly Revenue goals

1:01

what else can we figure out enter the

1:03

email campaign cool so let's walk

1:05

through the numbers so the email list

1:07

size was

1:09

3.3 million emails now this was over a

1:12

few years that we collected these emails

1:14

and it was a traditional think about it

1:16

like an e-commerce setup so it's was an

1:17

opt-in and then a sale and then upsells

1:20

so the next major number that we need to

1:22

know is that this was a \$2,000 price

1:25

point and we had an upsell on the back

1:28

end for about \$88,000

1:31

that a certain percentage customers

1:33

would take now the next piece that's

1:35

important for this is that we had buyers

1:37

and non buyers that were on the list so

1:40

this was just a total list of everyone

1:42

that we had ever had now in this

1:44

business traditionally to sell just this

1:46

\$2,000 item our cost to acquire customer

1:49

was

1:51

\$1,200 so not a lot of margin there left

1:55

over now you can do this because it's an

1:57

automated selling machine so you can

1:58

just crank on adsen with just this

1:59

particular business does it's a nine

2:01

figure company in terms of annual

2:02

revenue but we're like hey one of the

2:05

other stats about email that's important

2:06

is that the cost to a Car customer on

2:08

email once you've already acquired the

2:09

lead is \$0 which if I can have free

2:13

customers that means whatever my gross

2:15

profit is of selling my main thing drops

2:17

straight to my bottom line and so as a

2:19

mental contract for this I like to think

2:21

about email kind of like a long-term

2:23

investment account and so it's like you

2:25

run ads every single day or you do

2:28

outbound or whatever it is to build your

2:30

list up and that's kind of like your

2:32

paycheck right like you put work in and

2:34

you get paid back right and it's just

2:35

just like a direct relationship whereas

2:38

the email is kind of like your 401k it's

2:40

kind of like your investment account

2:41

that you put you put money into and then

2:42

over time it starts to compound and

2:44

compound and compound and if you have an

2:46

email strategy and I'm going to give you

2:47

kind of an overarching email strategy

2:49

that we like to employ in businesses

2:51

this business just is crushed doing what

2:53

we've been doing so it hasn't been the

2:54

main focus but if you have a business

2:56

like it is one of the easiest ways to

2:57

just immediately plug in and print money

2:59

and then the nice thing is is that even

3:01

if it's late to the game I mean this

3:02

this business does a lot of money uh you

3:06

can still employ it and then immediately

3:07

see the results there's two things about

3:09

email and having followup Beyond initial

3:13

followup that makes a business more

3:15

valuable number one is that all sales

3:17

that will come from email are going to

3:18

drop straight to the bottom line in

3:19

terms of profit and so most businesses

3:22

95% of businesses are traded on a

3:24

multiple of bottom line and so since

3:26

these sales drop straight to the bottom

3:28

line it will be a big enhance answer on

3:30

the Enterprise Value the second point is

3:32

that if you have consistent email sales

3:34

that come in that number isn't going to

3:37

really CH like tomorrow you don't go

3:38

from 3.3 million to one and a half

3:40

million emails on your list unless you

3:42

know you clean the list or whatever but

3:43

fundamentally the list size isn't going

3:44

to change overnight your ads might

3:46

change overnight but your email list

3:49

won't so what that does is it actually

3:50

can smooth out volatility that occurs in

3:53

a business which would make it more

3:55

attractive to an investor long term

3:57

you'd like to have some sort of regular

3:59

email Cadence because things like

4:01

deliverability and domain reputation and

4:04

things like that come into play I'm not

4:06

going to get into that stuff for this

4:07

video I'm just going to talk about big

4:09

picture email strategy that you can

4:10

employ in your business now to make

4:11

money great now that we have the numbers

4:13

in the context let's talk about the

4:14

campaign so what we did for the list is

4:17

that we promoted a challenge and it was

4:19

a 7-Day Challenge and the reason that I

4:22

think this is interesting and important

4:25

is that number one this came from the

4:27

marketing director and I think the

4:28

reason that I want to highlight this is

4:30

that this is why you need to have smart

4:32

people this didn't come from me this

4:33

didn't come from the founder the

4:34

marketing director was like hey I think

4:36

we should do a challenge now we weren't

4:38

actually super on board for this because

4:39

we're like hey this might be a

4:40

distraction but it turned out to be

4:41

really really good and added over a

4:43

hundred million in Enterprise Value to

4:44

the business remember this business is

4:46

already a multi hundred million dollar

4:47

Enterprise Value business and so adding

4:49

10 or 20% to the Enterprise Value can be

4:51

a very big difference the second thing

4:53

is this challenge actually came from the

4:55

product and so we pulled out something

4:57

that was already something that we knew

4:58

work that we were for customers we

5:00

pulled it out and we made it into a lead

5:02

magnet and so fundamentally a lead

5:03

magnet is a very is a complete solution

5:05

to a very narrow problem and ideally

5:07

once you solve that problem you create

5:09

the next problem which you solve with

5:10

your offer and so fundamentally that is

5:12

what a good lead magnet does and this is

5:14

why challenges I think are very strong

5:16

lead magnets for a lot of businesses

5:18

because they also satisfy all the

5:20

elements of a value equation which I

5:21

talk about in my first book \$100 million

5:23

offers which has sold almost a million

5:25

copies so far now the value equation

5:28

works like this you've got the out

5:30

which is the thing that people want and

5:31

so as long as you have a clearly defined

5:33

outcome that they want then that becomes

5:36

more valuable now you multiply that by

5:38

low risk or the perceived likelihood of

5:40

achievement How likely is it that when I

5:43

buy this thing I'm going to get this

5:44

thing if you have an outcome you want

5:45

and it's guaranteed to get it you're

5:47

this is going to be really valuable but

5:48

there's two other elements the thing is

5:50

is how long is it going to take so if it

5:52

takes a really long time then I'm be

5:55

like okay sure I have this outcome which

5:57

is I get really rich and the guarantee

5:59

is is that it'll definitely happen but I

6:01

got to wait 20 years of investing my

6:02

money to become really rich well it's

6:04

not as attractive anymore right then you

6:07

do uh ease which is how hard is it so

6:10

effort and sacrifice that are associated

6:12

with this outcome and so these are the

6:14

four elements of value and so a

6:16

challenge is a really clear outcome that

6:18

everybody wants it has high likelihood

6:20

of actually happening it happens really

6:22

fast because we get attach of time to it

6:24

and because we're going to say hey we're

6:26

only going to do this one thing and

6:27

we're going to give you all the steps it

6:28

the perception of the Prospect is that

6:30

it's easy which makes these very strong

6:32

lead magnets if you want to go through

6:33

the experience of what going through one

6:35

of these challenges looks like and you

6:36

are somebody who wants to start a

6:37

business already have a business either

6:39

way you can go join the school challenge

6:41

for free it's for 14 days we walk you

6:43

through everything that we have I take

6:45

calls in that Community to help people

6:46

get their first business online started

6:49

we have everything down step by step

6:50

once a month I drop a full day

6:52

Mastermind training of all the people

6:53

who are starting communities and making

6:54

them uh we've got it down like we're

6:56

pretty good at helping people get to

6:57

that first dollar and so you can for

6:59

free go to school.com games and I'll see

7:02

you in there so for this particular

7:04

business it's a business that helps

7:05

people achieve an outcome that actually

7:07

takes a little bit of time and so what

7:09

we did was say okay is there a smaller

7:11

mini version of this big outcome that we

7:13

can just kind of give them a taste so if

7:14

I was in weight loss I'd probably have

7:16

them do some sort of like 7-Day cleanse

7:18

or something like that again I'm not

7:20

going to get into what's good what's bad

7:22

here I'm just saying that I would have

7:24

some person that gets you know they lose

7:26

7 lbs in 7 days a lot of that's going to

7:28

be water but they're excited about it

7:29

they're like great now let's talk about

7:31

your long-term goals right because now

7:33

they have a element of belief they

7:34

they've taken action they've gotten some

7:36

reward for their behavior they've

7:37

interacted with us all of these things

7:39

align with them making a purchase what

7:41

challenges do is they approximate brand

7:44

and so this is how it actually works the

7:46

reason the direct response internet

7:47

marketing world does a lot of these

7:49

things is because none of them have

7:50

Brands and so like for me for example if

7:53

someone's already consumed a gazillion

7:55

videos of mine or podcast of mine then

7:57

if I say hey do you want to check this

7:58

thing out a lot of people are like yeah

7:59

you've already given me a gazillion

8:00

other things and so sure but if you're

8:03

brand new then what you do is you

8:05

basically approximate a relationship

8:07

where you would have already had a lot

8:08

of interaction so you basically try and

8:09

cram you know a six-month relationship

8:12

into seven days so it's kind of like one

8:14

of those dating shows where they say

8:15

will you get married in 30 days and they

8:17

like try and cram a whole relationship

8:19

into that period it actually kind of is

8:21

the same thing when you come from a

8:22

marketing perspective you're just

8:24

rapidly warming up you're like

8:25

microwaving the prospect rather than

8:27

slow cooking it which is kind of the

8:28

normal branding

8:29

right and for example in the school

8:31

games that's our version of a challenge

8:33

right we just call the school games the

8:34

cooler rapper we have leaderboards and

8:35

prizes and like that and so we walk

8:38

people through how to start a business

8:40

online and so we get one out of three

8:42

people just under to get their first

8:44

dollar within their first month which is

8:46

pretty cool we put a lot of time into

8:47

getting that kind of outcome and then

8:49

once someone makes a dollar then they're

8:50

like shoot I can see how I could make

8:52

more dollars and so that's the idea is

8:54

like you want to approximate you want to

8:55

do it really fast you make as easy as

8:57

possible make it as guaranteed as

8:58

possible and an outcome that they care

8:59

about so now that you know what the

9:00

setup is let's go back and add a couple

9:02

of numbers to this campaign and then

9:04

I'll walk you through it happened so we

9:06

sent the emails only to a small sub

9:09

segment of the list so we had 464,000

9:12

people that we sent it to and that was

9:15

because we wanted to test it out we

9:16

didn't want to blow our load on

9:19

the on the whole

9:21

list and so we just set it to like 15%

9:24

of the list and the reason we did that

9:26

is cuz like hey if this thing bombed we

9:27

didn't want to like piss off the entire

9:29

list list and so we sent it to 15% of

9:31

the list a lot of them were non- buyers

9:33

and from there what we saw is we had

9:34

10,000 people who

9:38

registered for this thing which good or

9:41

bad whatever for us in an absolute

9:43

number 10,000 people shows a a pretty

9:45

decent amount of Interest so in order to

9:47

get this 10,000 we had an 18% open rate

9:51

meaning 18 you know just about one out

9:53

of five people opened the actual email

9:56

okay great now from there we had about

9:58

five % of those people actually click to

10:03

join the thing and then the rest was the

10:05

optim percentage on the page to register

10:07

that got us to 10,000 so it went from

10:09

464 to

10:10

83,000 uh that opened it from the 83,000

10:14

10,000 of them actually registered so a

10:16

pretty good percentage actually uh who

10:19

did click wanted to do it and as you get

10:21

into a Cadence of this which I'll

10:22

explain at the end in terms of how to

10:23

implement this ongoing as an email

10:25

strategy to make more money is that as

10:27

soon as you really nail what that that

10:29

lead magnet is or what that challenge is

10:31

or whatever it is that you're going to

10:32

get your leads to engage again or

10:34

re-engage these funnel metrics will

10:36

always improve you're going to split

10:37

test the subject headlines you're going

10:38

to split test the opening on the email

10:40

you're going to split test the ctas and

10:41

the links that you're going to use the

10:43

landing pages that you send them to the

10:44

offer that you that you attract them

10:46

with the headline of the the naming of

10:48

the challenge which by the way is a

10:49

great way to vary this up if you do it

10:51

like once a quarter which I'll talk

10:52

about later like you can do the same

10:54

play but you just put a different

10:56

wrapper on it so for example in the gym

10:58

World cuz I came from this world it's

10:59

like I might have a six week uh you know

11:02

six we challenge I might have a 42-day

11:04

fix I might have a 42-day transformation

11:07

I might have a six we booty blast I

11:09

might have a six week uh slim for Santa

11:12

I might have a lean by Halloween like

11:14

I've done a lot of these accountabil

11:16

buddy you know challenge like I've done

11:18

a lot and you know slim for summer all

11:20

of these things work um but

11:22

fundamentally what are we going to do

11:23

we're going to eat you're going to eat

11:24

less you're going to move more and so

11:26

even though the deliverable of the

11:28

challenge or the lead magnet might more

11:29

or less be the same you can just wrap it

11:31

seasonally or you can wrap it based on a

11:33

specific pain point that happens at that

11:35

time of year so let me walk you through

11:36

the the results math

11:42

right so we'll do a clean page so we had

11:45

10,000 people who registered I actually

11:47

don't have the data on how many people

11:49

uh attended live and watched throughout

11:51

the whole seven days I can get this but

11:53

I'll just I know that the high level and

11:55

so from 10,000 we had 800 people who

11:58

actually bought all right so we had

12:01

about 8% of people who made the purchase

12:03

which is pretty good not unhappy about

12:05

that at all do I think we can improve it

12:07

yes but fundamentally this was to a list

12:09

of plenty of people who hadn't bought

12:10

they knew who we were so I'd say it was

12:12

a little bit warmer than true cold uh

12:14

but a lot of them had never bought

12:15

anything from us before and so that

12:17

resulted remember this is a \$2,000 price

12:19

point in \$1.6 million in new sales that

12:22

we did just from this email campaign

12:24

you're like wait a second I thought you

12:25

said you did 2 million or more than 2

12:26

million let me explain what happened

12:28

from there so from there we had 20% of

12:31

people ascended into the AK product

12:33

which allowed us to make an extra 800k

12:36

from the ascensions and so that gave us

12:39

\$2.4 million in total from this 7-Day

12:43

email campaign now I want to break

12:45

something very cool off for you which is

12:47

that you see 2.4 million now that was

12:50

derived from a list that was 464,000

12:54

emails and so that means we were making

12:56

roughly six bucks per email in this

13:00

campaign and so if you know that you do

13:03

this call it four times a year which I

13:06

would recommend you do when we get into

13:08

the takeaway section meaning one time

13:09

per quarter you do a cleanup we say

13:12

great we're going to take all the leads

13:13

that we had and we're going to run them

13:14

through a conversion mechanism in this

13:16

way it's not like oh shoot I have to do

13:18

this all the time it's like all right

13:19

I'm going to do this big thing we do it

13:20

once a quarter and we clean up our q1 we

13:22

clean up our Q2 we clean up R Q3 by

13:25

running all of our leads through this

13:26

High converting funnel that we've

13:28

structured purposely for non- buyers so

13:29

we have different hooks different front

13:31

ends that has different messaging that

13:33

might not have been the primary message

13:34

that converts the most people which is

13:36

our first you know whack at it but this

13:38

is our second and third whack at it and

13:40

by varying the titles that you use in

13:43

each of the quarterly things that you do

13:44

so q1 will have a different name than Q2

13:47

you'll still be able to attract people

13:48

without necessarily fatiguing or tiring

13:50

the list and in between those times you

13:52

can then simply provide value to the

13:54

list and so you've deposited some

13:55

Goodwill that earns you the right to be

13:57

able to ask for the sale so let me walk

14:00

you through the takeaways that we had

14:01

from this that you can use for your own

14:03

business to make more money so there's

14:06

four main takeaways that I would

14:08

recommend you take from this that I take

14:09

from this number one is smart people all

14:12

right so you have to be able to trust

14:14

your people to make recommendations now

14:17

neither the CEO nor I so I like to say

14:19

this like I also am not always in favor

14:22

of ideas that make lots of money cuz I

14:23

mess up too um but we were like you know

14:26

what they're a little closer to it we

14:27

will trust that they're super excited

14:28

about it cuz the flip side is if you

14:30

bash every idea that your team comes to

14:32

you with then they're not they're going

14:33

to stop thinking about ideas and then

14:34

all of a sudden you're like why doesn't

14:35

my my team ever think of anything it's

14:37

like well because you turn them down

14:38

every time and so there's kind of like

14:40

what Hills do I want to die on and what

14:42

times do I want to say hey give it a

14:44

shot I don't think like is this going to

14:45

do damage to the brand no I don't think

14:47

so we're currently not doing anything

14:48

there and if you're really passionate

14:50

about it sure let's do it so one having

14:52

smart people two which is trusting them

14:55

all right so I say this is still his

14:56

first kind of people related for this is

14:58

you still got to trust those people and

15:00

make a bet with them and part of the

15:02

reason I say trust them obviously you

15:03

want to trust them because they're

15:04

competent they're intelligent and

15:05

they're well-intentioned but the other

15:07

thing is that they sometimes just have

15:08

data that you don't have because

15:10

fundamentally in a business there's data

15:12

that's happening all over the place and

15:13

you are only going to get Snippets as a

15:15

CEO especially the bigger the company is

15:16

right this is the business of almost 10

15:17

million a month like it's a very large

15:19

business there's lots of things going on

15:20

and so that person is going to be much

15:22

closer to the data have a much closer

15:24

pulse uh than sometimes the founder or

15:26

CEO might have and so sometimes they

15:28

have data that you're not working with

15:30

and that's why extending a bridge of

15:31

trust is is is important so the second

15:34

takeaway is

15:37

offers to money all right so the amount

15:41

of offers that you make to any Prospect

15:43

is directly correlated with the amount

15:45

of money that you'll make with the

15:46

single caveat that every time you make

15:48

an offer you lose Goodwill and so what

15:50

you want to do is make sure that you're

15:51

depositing sufficient Goodwill that you

15:52

can earn the ask and so make as many as

15:56

you can while also providing as much

15:59

value as you can which means that if you

16:01

want to make a lot of offers you just

16:02

got to provide that much more value now

16:04

with this particular instance we were

16:06

going to a list that we had emailed but

16:08

not a lot but we hadn't really emailed

16:10

any offers to in a very long time and so

16:12

even though we weren't putting a ton of

16:14

value our give to ask ratio was still

16:17

okay because we hadn't asked at all and

16:20

so I talk about the give to ask ratio in

16:22

the content section of this book and the

16:24

reason that I actually consider email a

16:26

form of content is that it's one to many

16:28

distribution to people who know you now

16:31

it's just free which also is just like

16:34

when you post on social media the only

16:35

difference is that you control 100% of

16:38

who gets this whereas on social media

16:39

algorithms and things that distribute

16:41

your content but fundamentally you're

16:42

Distributing one message to many people

16:44

and it's free and so that is what makes

16:46

email so profitable just like organic

16:49

and I want to add a little caveat here

16:51

which is that it's okay to ask for the

16:54

sale again and so all these people or

16:57

the majority of these buyers hadn't

16:58

bought bought this thing and so when we

17:01

asked again some people are afraid of

17:02

making the second ask but people get

17:04

busy you know they they leave a shopping

17:06

cart up and then they you know their

17:08

their kid screams and they forget about

17:09

it like it happens and so you can't get

17:12

too bent out of shape on the fact that

17:14

like you're going to offend people by

17:16

asking them it's okay to ask as long as

17:18

you earned the right and you've given

17:20

until you've deposited enough Goodwill

17:22

that there's enough demand there surge

17:24

there that you can let loose the valve

17:26

of money and it can come on and then you

17:28

can close it again

17:29

so the third takeaway is that you can

17:30

sell the same thing in a different way

17:33

and so I can sell a product on a webinar

17:38

I could sell it on a phone I could sell

17:39

it via a live Workshop in person I could

17:42

sell it via email and so you can have

17:45

less offer fatigue by selling the same

17:48

offer in a different medium and so you

17:51

can get more hacks or more at bets

17:53

because people will judge their Goodwill

17:56

with you based on the medium that you're

17:58

communicating in and so this is

17:59

something that I have found it also by

18:01

the way is a great way to vary products

18:03

up and so for example if you're an

18:05

educator I'll just use this because it's

18:06

simple uh if I have content on the

18:09

internet that's free if I make a course

18:12

you could charge for it or you could

18:13

make it free if I deliver that same

18:15

course in a book format it's not going

18:17

to be able to sell for the same amount

18:18

that a course could if I deliver that

18:20

same format in a live inperson

18:22

experience that's going to be probably

18:24

charged significantly more than it would

18:26

in a digital format if I did a live

18:28

format but virtual it would be a

18:29

different price point than the live and

18:31

in person and so for each of these

18:33

mediums even if the same commun same

18:35

information is being taught you price it

18:37

differently it's the same reason that

18:38

when you go in person in college they

18:40

charge you a arm and a leg for it but

18:42

digital College almost ubiquitously is

18:45

way way way lower priced even though

18:47

it's the same information it's simply

18:48

being delivered through a different

18:50

medium and so you can sell in different

18:53

mediums and deliver in different mediums

18:55

and from my experience people will

18:56

apprise or judge the decision based on

18:59

that Medium exclusively so the fourth

19:01

takeaway is what I'll just call the

19:03

quarterly cleanup so this is probably

19:06

the most tactical recommendation that I

19:08

can give you that I alluded to a little

19:09

bit earlier which is I would recommend

19:11

that you do this once every quarter you

19:14

do this conversion mechanism whether you

19:16

do some sort of challenge or some sort

19:17

of defined outcome or some sort of lead

19:19

magn that you use to re-engage your list

19:22

and put them through some sort of

19:23

conversion event with a deadline with a

19:25

big promise that you know you can

19:26

deliver on and so if you do this once a

19:28

a quarter and you weren't doing this you

19:30

could almost immediately add like you

19:31

saw the the numbers there we had \$6 per

19:34

email from that \$450,000 sub segment now

19:38

to prove that this worked what we did

19:40

was we just did it again by the way one

19:42

of my favorite business strategies do

19:44

something that works do it again do more

19:47

of it and ideally do it better and so we

19:49

ran the exact same play again to a

19:50

different Subs segment of the list and

19:52

boom we hit 2.2 million we didn't even

19:54

wait a quarter we just did it the next

19:55

month and so I say this because this

19:58

stuff works and once you know it works

20:00

you can keep duplicating it over and

20:01

over again and guess what we're going to

20:02

do next quarter now that we know that we

20:04

tested it on two subse segments we're

20:06

going to do it to the whole list and

20:07

we're going to use the learnings that we

20:09

had from the first two tests and so if

20:11

you are going to run this as the corner

20:12

cleanup I would recommend using 10% of

20:15

your list or a smaller percentage

20:16

because believe me as soon as you learn

20:18

the things that you messed up on the

20:19

first try you're going to be really

20:20

grateful that you didn't run into the

20:21

entire list so do one two or three test

20:24

runs before you blow the the whole list

20:27

up with this new uh promo that you've

20:30

already tested the messaging the subject

20:32

head the ctas the landing page those

20:34

little tests that you can run in the

20:35

meantime that can sometimes double or

20:38

triple the throughput of the campaign

20:40

and so with every one of these campaigns

20:42

I would recommend always testing some

20:44

elements of it so you can always make it

20:45

a little bit better and so one you're

20:47

doing this every quarter two you can

20:50

test it with a small portion of the list

20:52

three is that in order to make it seem

20:54

and appear different to the non- buyer

20:56

who doesn't buy on the first hack or the

20:58

second hack we change the naming of it

21:00

or the wrapper of it so change the

21:02

landing page change the subject head of

21:03

the email change the name of the

21:05

challenge or the lead magnet even if the

21:06

core components are the same

21:08

fundamentally your business isn't going

21:09

to change right but the way that you

21:11

position it or the reason why that you

21:13

have the promotion can and I recommend

21:16

doing something that's seasonal or doing

21:17

something that's a life event for you I

21:18

talked about this in the the last

21:20

chapter of the offers book which this is

21:22

ESP specially important for local

21:23

businesses because you have much smaller

21:24

audiences and so fatigue happens much

21:27

faster with a tiny audience and so you

21:28

actually have to have a lot more variety

21:30

and I know this cuz that was the world I

21:31

came from and so that's why I have all

21:33

these these isms in the back of my mind

21:35

of how I had to wrap and rewrap the same

21:37

thing which is fundamentally Fitness and

21:38

Nutrition right like how many ways can I

21:40

slice it turns out a lot and I will say

21:43

that once you have one annual calendar

21:45

you can pretty much stick with it so you

21:46

don't need to come up with another thing

21:48

next year once you have your four big

21:50

promos that you're going to run

21:51

throughout the year that you know are

21:51

tested those just become autopilot and

21:54

they just become cash printers and if

21:55

this type of case study deep breakdowns

21:57

on business interesting you I have

21:59

another one where I doubled one of our

22:00

portfolio companies in 60 days check

22:01

that one out
